§2580.86 Description of Actuarial Memorandum Including an Asset Adequacy Analysis and Regulatory Asset Adequacy Issues Summary.

(a) General

(1) In accordance with Section 10489.15~~(b)~~ of the Insurance Code, the ~~A~~appointed ~~A~~ctuary shall prepare a memorandum to the ~~C~~company describing the analysis done in support of his or her opinion regarding the reserves ~~under a Section 2580.7 opinion~~. The memorandum shall be made available for examination by the Commissioner upon his or her request but shall be returned to the ~~C~~company after such examination and shall not ~~be~~ considered a record of the insurance department or subject to automatic filing with the Commissioner.

(2) In preparing the memorandum, the ~~A~~appointed ~~A~~ctuary may rely on, and include as a part of his or her own memorandum, memoranda prepared and signed by other actuaries who are qualified within the meaning of Section 2580.4(b) of this regulation, with respect to the areas covered in such memoranda, and so state in their memoranda.

(3) If the Commissioner requests a memorandum and no such memorandum is received within 60 calendar days of the date of mailing the request, or if the Commissioner finds that the analysis described in the memorandum fails to meet the standards of the Actuarial Standards Board or the standards and requirements of this regulation, the Commissioner may designate a ~~Q~~qualified ~~A~~ctuary to review the opinion and prepare such supporting memorandum as is required for review. The reasonable and necessary expense of such independent review shall be paid by the ~~C~~company but shall be directed and controlled by the Commissioner.

(4) The reviewing actuary shall have the same status as an examiner for purposes of obtaining data from the ~~C~~company and the work papers and documentation of such reviewing actuary shall be retained by the Commissioner; provided, however, that any information provided by the ~~C~~company to such reviewing actuary and included in the work papers shall be considered as material provided by the ~~C~~company to the Commissioner and shall be kept confidential to the same extent as is prescribed by law with respect to other material provided by the ~~C~~company to the Commissioner pursuant to the statute governing this regulation. The reviewing actuary shall not be an employee of a consulting firm involved with the preparation of any prior memorandum or opinion for the insurer pursuant to this regulation for any one of the current year or the preceding three years.

(5) In accordance with Section 10489.15 of the Insurance Code, the Appointed Actuary shall prepare a regulatory asset adequacy issues summary, the contents of which are specified in Subsection 2580.6(c). The regulatory asset adequacy issues summary will be submitted no later than March 15 of the year following the year for which a statement of Actuarial Opinion based on asset adequacy is required. The regulatory asset adequacy issues summary is to be kept confidential to the same extent and under the same conditions as the actuarial memorandum.

(b) Details of the Memorandum Section Documenting Asset Adequacy Analysis. ~~(Section 2580.7)~~

When an ~~A~~ctuarial ~~O~~pinion under Section 2580.7~~5~~ is provided, the memorandum shall demonstrate that the analysis has been done in accordance with the standards for ~~A~~asset ~~A~~dequacy ~~A~~alysis referred

to in Subsection 2580.4(d) of this regulation and any additional standards under this regulation. It shall specify:

(1) For reserves:

(A) Product descriptions including market description, underwriting and other aspects of a risk profile and the specific risks the Appointed Actuary deems significant;

(B) Source of liability in force;

(C) Reserve method and basis;

(D) Investment reserves;

(E) Reinsurance arrangements;

(F) Identification of any explicit or implied guarantees made by the general account in support of benefits provided through a separate account or under a separate account policy or contract and the methods used by the Appointed Actuary to provide for the guarantees in the Asset Adequacy Analysis; and

(G) Documentation of assumptions to test reserves for the following:

1. Lapse rates (both base and excess);

2. Interest crediting rate strategy;

3. Mortality;

4. Policyholder dividend strategy;

5. Competitor or market interest rate;

6. Annuitization rates;

7. Commissions and expenses; and

8. Morbidity.

The documentation of the assumptions shall be such that an actuary reviewing the actuarial memorandum could form a conclusion as to the reasonableness of the assumptions.

(2) For assets:

(A) Portfolio descriptions, including a risk profile disclosing the quality, distribution and types of assets;

(B) Investment and disinvestment assumptions;

(C) Source of asset data;

(D) Asset valuation bases; and

(E) Documentation of assumptions made for:

1. Default costs;

2. Bond call function;

3. Mortgage prepayment function;

4. Determining market value for assets sold due to disinvestment strategy; and

5. Determining yield on assets acquired through the investment strategy.

The documentation of the assumptions shall be such that an actuary reviewing the actuarial memorandum could form a conclusion as to the reasonableness of the assumptions.

(3) For the Analysis basis:

(A) Methodology;

(B) Rationale for inclusion or exclusion of different blocks of business and how pertinent risks were analyzed;

(C) Rationale for degree of rigor in analyzing different blocks of business (include in the rationale the level of "materiality" that was used in determining how rigorously to analyze different blocks of business);

(D) Criteria for determining asset adequacy (include in the criteria the precise basis for determining if assets are adequate to cover reserves under "moderately adverse conditions" or other conditions as specified in relevant Actuarial Standards of Practice); and

- (E) Effect of federal income taxes, reinsurance and other relevant factors. Whether the impact of federal income taxes was considered and the method of treating reinsurance in the Asset Adequacy Analysis;
- (4) Summary of Results Summary of material changes in methods, procedures, or assumptions from prior year's Asset Adequacy Analysis;
- (5) Conclusion(s) Summary of results; and
- (6) Conclusions.
- (c) Details of the Regulatory Asset Adequacy Issues Summary.
- (1) The regulatory asset adequacy issues summary shall include:
- (A) Descriptions of the scenarios tested (including whether those scenarios are stochastic or deterministic) and the sensitivity testing done relative to those scenarios. If aggregate negative ending surplus results under certain tests, the actuary should describe those tests and the amount of additional reserve as of the valuation date which, if held, would eliminate the negative aggregate surplus values. Ending surplus values shall be determined by either extending the projection period until the in force and associated assets and liabilities at the end of the projection period are immaterial or by adjusting the surplus amount at the end of the projection period by an amount reflecting an appropriate estimate of the value that can reasonably be expected to arise from the assets and liabilities remaining in force.
- (B) The extent to which the Appointed Actuary uses assumptions in the Asset Adequacy Analysis that are materially different from the assumptions used in the previous Asset Adequacy Analysis;
- (C) The amount of reserves and the identity of the product lines that had been subjected to Asset Adequacy Analysis in the prior opinion but were not subject to analysis for the current opinion;
- (D) Comments on any interim results that may be of significant concern to the Appointed Actuary;
- (E) The methods used by the actuary to recognize the impact of reinsurance on the Company's cash flows, including both assets and liabilities, under each of the scenarios tested;
- (F) Whether the actuary has been satisfied that all options, whether explicit or embedded, in any asset or liability (including but not limited to those affecting cash flows embedded in fixed income securities) and equity-like features in any investments have been appropriately considered in the Asset Adequacy Analysis; and
- (G) Any other items that the Commissioner may request.
- (2) The regulatory asset adequacy issues summary shall contain the name of the Company for which the regulatory asset adequacy issues summary is being supplied and shall be signed and dated by the Appointed Actuary rendering the Actuarial Opinion.
- (d)(e) Conformity to Standards of Practice.
- The memorandum shall include a statement:
- "Actuarial methods, considerations and analyses used in the preparation of this memorandum conform to the appropriate Standards of Practice as promulgated by the Actuarial Standards Board, which standards form the basis for this memorandum."

NOTE: Authority cited: Section 10489.15, Insurance Code. Reference: Section 10489.15, Insurance Code.

§2580.9. Additional Considerations for Analysis.

(a) Aggregation

For the asset adequacy analysis for the statement of actuarial opinion provided in accordance with Section 2580.7 of this regulation, reserves and assets may be aggregated by either of the following methods:

- (1) Aggregate the reserves and related actuarial items, and the supporting assets, for different products or lines of business, before analyzing the adequacy of the combined assets to mature the combined liabilities. The appointed actuary must be satisfied that the assets held in support of the reserves and related actuarial items so aggregated are managed in such a manner that the cash flows from such

~~aggregated assets are available to help mature the liabilities from the blocks of business that have been aggregated.~~

- ~~(2) Aggregate the results of asset adequacy analysis of one or more products or lines of business, the reserves for which prove through analysis to be redundant, with the results of one or more products or lines of business, the reserves for which prove through analysis to be deficient. The appointed actuary must be satisfied that the asset adequacy results for the various products or lines of business for which the results are so aggregated:~~

~~(A) Are developed using consistent economic scenarios, or~~

~~(B) Are subject to mutually independent risks, i.e., the likelihood of events impacting the adequacy of the assets supporting the redundant reserves is completely unrelated to the likelihood of events impacting the adequacy of the assets supporting the deficient reserves.~~

~~In the event of any aggregation, the actuary must disclose in his or her opinion that such reserves were aggregated on the basis of method (1), (2)(A) or 2(B) above, whichever is applicable, and describe such aggregation in the supporting memorandum.~~

~~(b) Selection of Assets for Analysis~~

~~The appointed actuary shall analyze only those assets held in support of the reserves which are the subject to specific analysis, hereafter called "specified reserves." A particular asset or portion thereof supporting a group of specified reserves cannot support any other group of specified reserves. An asset may be allocated over several groups of specified reserves. The annual statement value of the assets held in support of the reserves shall not exceed the annual statement value of the specified reserves, except as provided in Subsection (c) below. If the method of asset allocation is not consistent from year to year, the extent of its inconsistency should be described in the supporting memorandum.~~

~~(c)(c) Use of Assets Supporting the Interest Maintenance Reserve and the Asset Valuation Reserve.~~

An appropriate allocation of assets in the amount of the Interest Maintenance Reserve (IMR), whether positive or negative, must be used in any Asset Adequacy Analysis. Analysis of risks regarding asset default may include an appropriate allocation of assets supporting the Asset Valuation Reserve (AVR); these AVR assets may not be applied for any other risks with respect to reserve adequacy. Analysis of these and other risks may include assets supporting other mandatory or voluntary reserves available to the extent not used for risk analysis and reserve support.

The amount of the assets used for the AVR must be disclosed in the Table of Reserves and Liabilities of the opinion and in the memorandum. The method used for selecting particular assets or allocated portions of assets must be disclosed in the memorandum.

~~(d) Required Interest Rate Scenarios~~

~~For the purpose of performing the asset adequacy analysis required by this regulation, the qualified actuary is expected to follow standards adopted by the Actuarial Standards Board; nevertheless, the appointed actuary must consider in the analysis the effect of at least the following interest rate scenarios:~~

~~(1) Level with no deviation;~~

~~(2) Uniformly increasing over ten (10) years at a half percent per year and then level;~~

~~(3) Uniformly increasing at one percent (1%) per year over five (5) years and then uniformly decreasing at one percent (1%) per year to the original level at the end of ten (10) years and then level;~~

~~(4) An immediate increase of three percent (3%) and then level;~~

~~(5) Uniformly decreasing over ten (10) years at a half percent per year and then level;~~

~~(6) Uniformly decreasing at one percent (1%) per year over five (5) years and then uniformly increasing at one percent (1%) per year to the original level at the end of ten (10) years and then level; and~~

~~(7) An immediate decrease of three percent (3%) and then level.~~

For these and other scenarios which may be used, projected interest rate for a five (5) year Treasury Note need not be reduced beyond the point where such five (5) year Treasury Note yield would be at fifty percent (50%) of its initial level.

~~The beginning interest rates may be based on interest rates for new investments as of the valuation date similar to recent investments allocated to support the product being tested or be based on an outside index, such as Treasury yields, of assets of the appropriate length on a date close to the valuation date. Whatever method is used to determine the beginning yield curve and associated interest rates should be specifically defined. The beginning yield curve and associated interest rates should be specifically defined. The beginning yield curve and associated interest rates should be consistent for all interest rate scenarios.~~

~~(f)~~ (e) Documentation.

The Appointed Actuary shall retain on file, for at least seven years, sufficient documentation so that it will be possible to determine the procedures followed, the analyses performed, the bases for assumptions and the results obtained.
